## Ford Airport Goes Wireless

---

*Free Internet Service Available Throughout Terminal*

---

*December 16, 2005* – In a move designed to bring added convenience, efficiency, and productivity to users of the Gerald R. Ford International Airport, the Kent County Aeronautics Board has introduced wireless Internet service, available as of today throughout the Airport's passenger terminal building. This new "WiFi" service is being offered to Airport patrons free of charge.

Airport customers with WiFi-enabled laptops or PDA's may now connect to the Internet to check e-mail, conduct business, download documents, even surf the Web, with unlimited access anywhere from the curb front to the airplane. And all at no charge. This new WiFi service is powered by ICOA Airport Networks, a leading provider of high-speed wireless broadband Internet solutions in high-traffic public locations.
